

**Invitation to the AMICE Workpackage 1 progress meeting
Metz (France), March 11th, 2010**

Dear Madam, Dear Sir,

The AMICE Partners have now been working for one year. WorkPackage 1 'Impacts of future floods and low-flows' focused most specifically on the analysis of climate change scenarios for the coming century and the impact of future climate conditions on the hydrology of the international Meuse basin. The AMICE Partners have delivered their first results and we would like to present them to all AMICE-contacts.

You are kindly invited to attend a WP1 meeting at the University of Metz (France), on March 11th, 2010. The presentations will be translated into French, Dutch and German and you will have the opportunity to address directly the scientists from the 4 countries involved in the study.

Looking forward to meeting you in Metz,

Yours sincerely,

The President,

A handwritten signature in blue ink that reads 'Jeanteur'.

Jacques JEANTEUR

Meeting Program – March 11th, 2010

WP1 Partners only

(office number C4, ground floor, Department of Geography, UFR Sciences Humaines et Arts)

10:00 – 13:00 : Action 3 conclusions – Last requirements for Progress Report – Action 6 starting (methodology and questionnaires) – Preparation Meuse Symposium

All Participants - (room « Ferrari », Maison de l'Université)

14:30 Short presentation of the AMICE Project and WorkPackage 1 activities

15:00 Bibliography analysis

15:30 Choice of climate scenarios for the Meuse basin

16:00 *coffee break*

16:15 Methodology for Hydrology modelling

16:45 Conclusions of the Hydrology modelling

17:00 Open questions

Location : Campus du Saulcy -> Maison de l'Université (see the map below)

Registration :

You are kindly requested to let us know whether you will attend this AMICE event or not, so that we can arrange for a sufficient number of seats and headsets.
