

# Adaptation of the Meuse to the Impacts of Climate Evolutions

This project has received  
European Regional  
Development Funding  
through INTERREG IV B.

INTERREG IVB

# Adaptation of the Meuse to the Impacts of Climate Evolutions

## General Introduction

October 1st, 2010 – Amel – Belgium  
Maité Fournier – AMICE project coordinator

# AMICE in brief

- ✓ 4 years of studies and works : 2009-2012
  - ✓ 4 countries involved : FR, BE, DE, NL
  - ✓ 17 Partners - Lead Partner : EPAMA
  - ✓ Budget 8,9 million €
  - ✓ European Programme Interreg IV B

# Ambitions

- 
- ✓ Define a common strategy of adaptation to the impacts of climate evolutions
  - ✓ Realise a set of measures beneficial for the entire Meuse basin
  - ✓ Strengthen and widen the partnership between the stakeholders of the international basin
  - ✓ Involve the population and decision-makers through knowledge of the Meuse basin and risk-consciousness

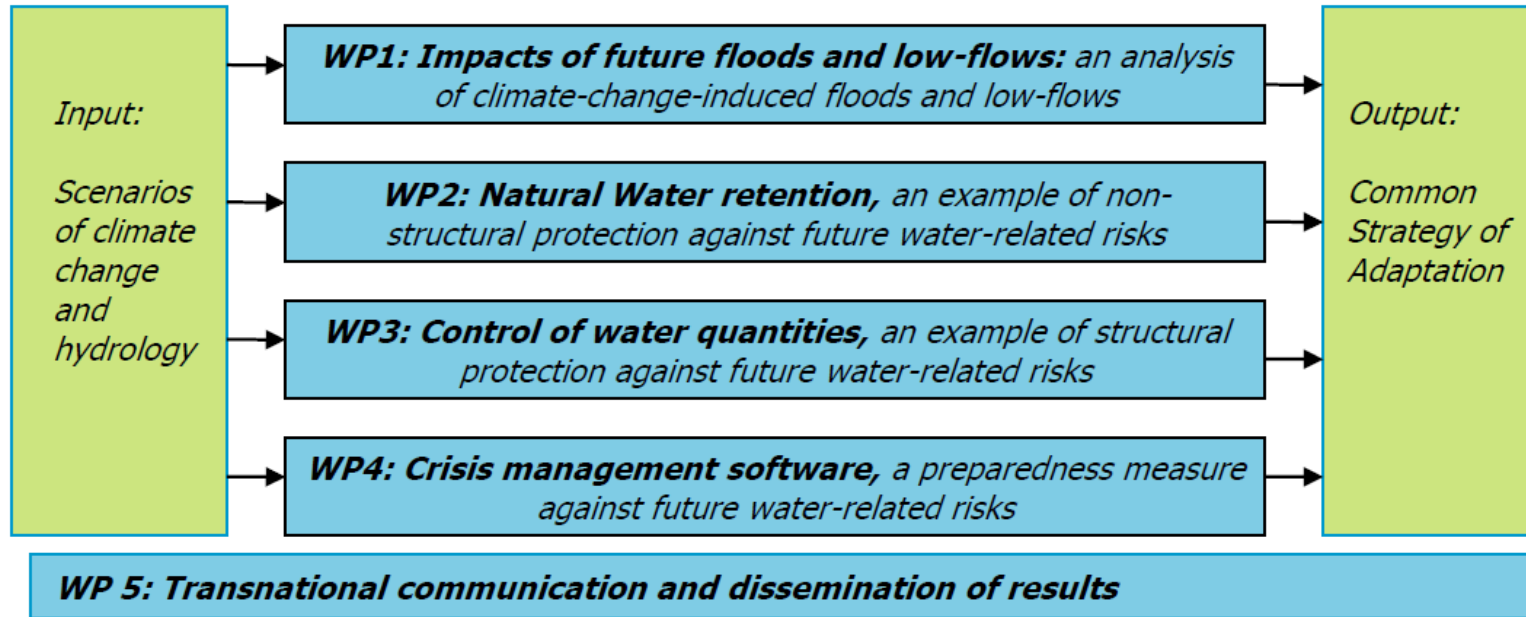

# Funding

[www.nweurope.eu](http://www.nweurope.eu)

- ✓ 2.8 million € from the Interreg IV B Program
- ✓ Local, regional, national authorities
- ✓ Water agencies and water associations

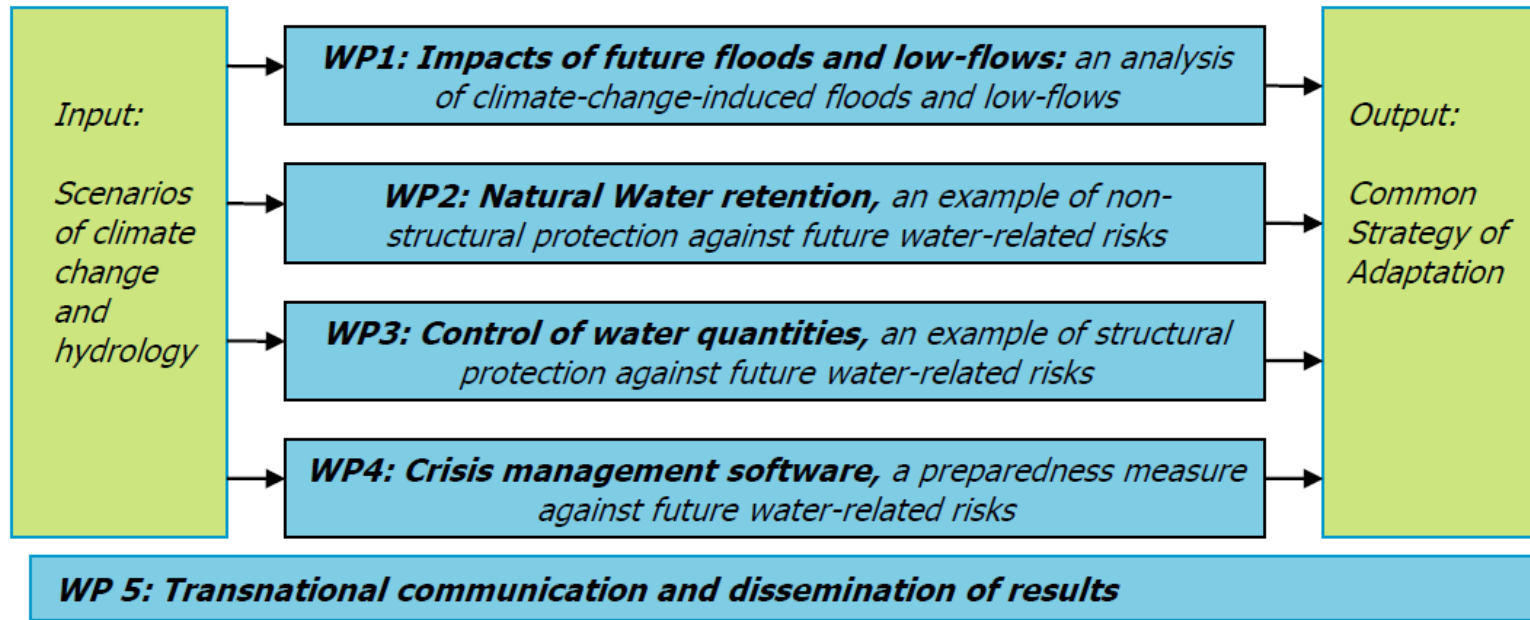

# Adaptation 1 : Knowledge

# Adaptation 2 : Nature conservation

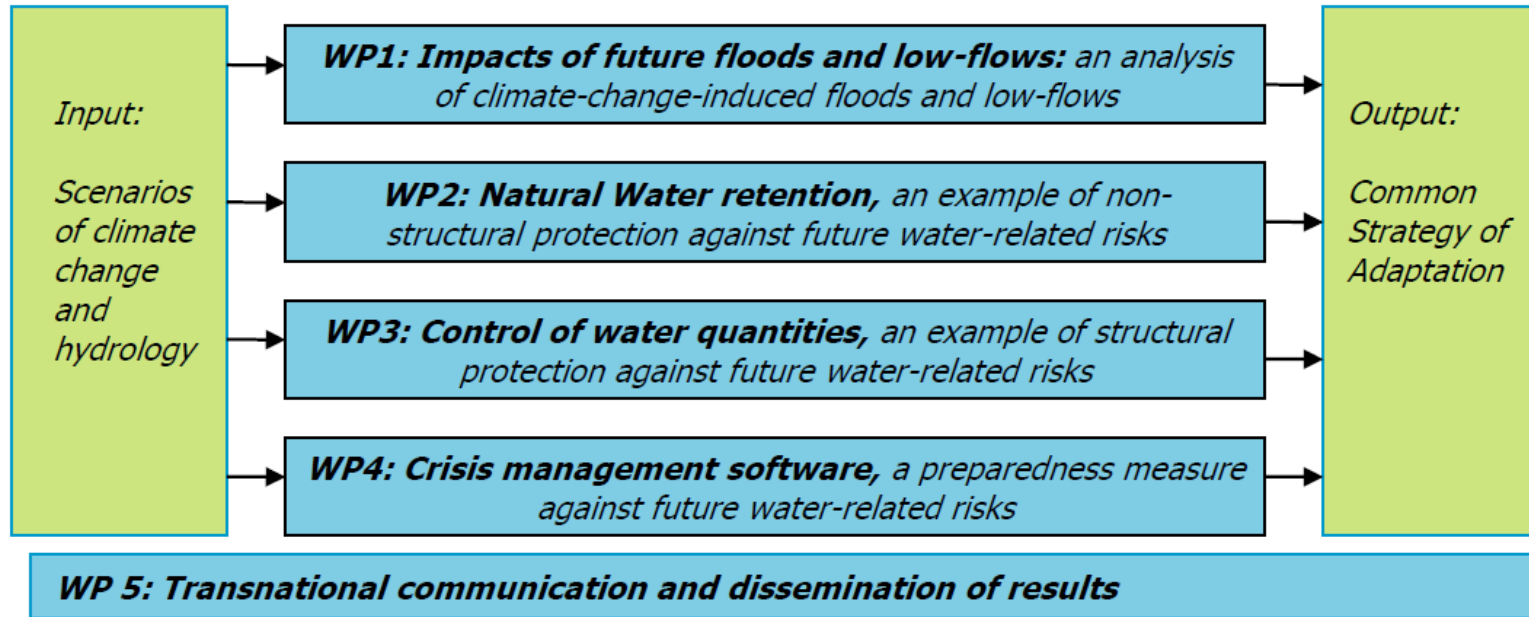

# Adaptation 3 : Storages management

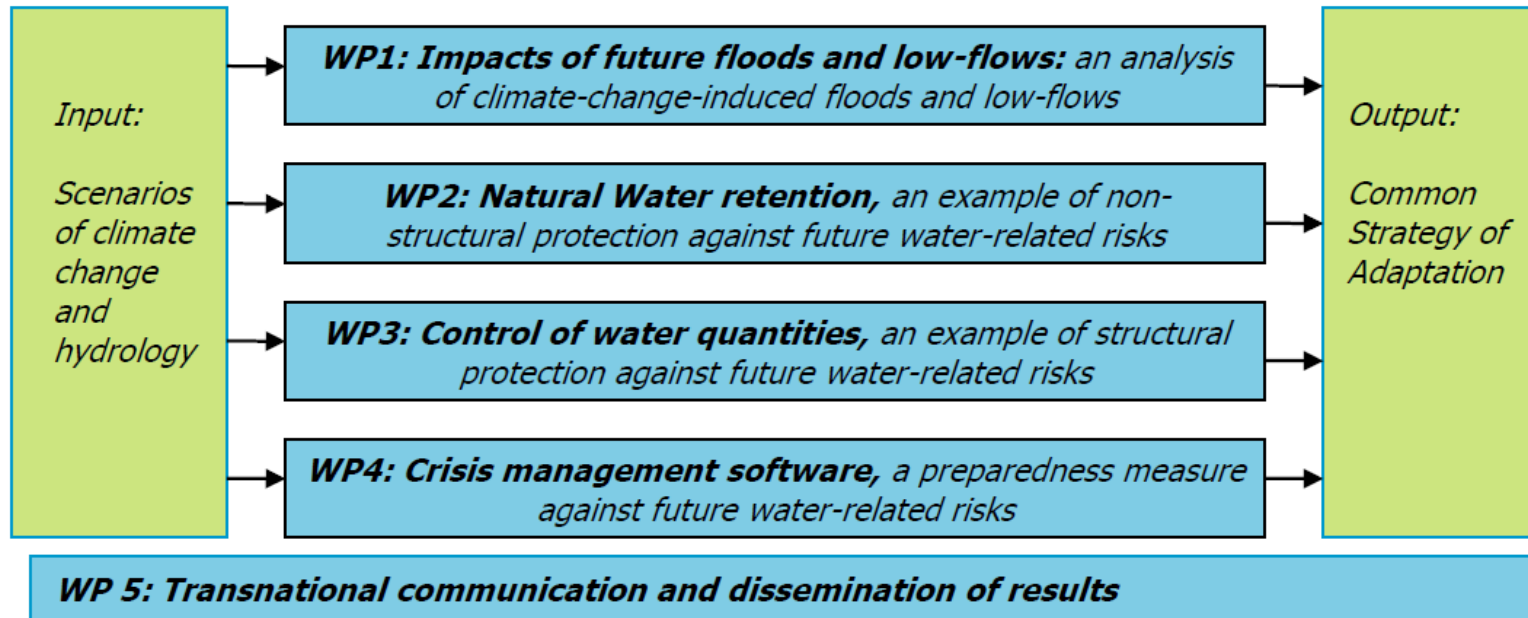

# Adaptation 4 : Preparedness

**FL**lood **I**nformation  
and **WA**rning **S**ystem

# Adaptation 5 : Communication
